(54) Title: METHOD AND APPARATUS FOR APPLYING MEDICATION TO INTERNAL TISSUE

(57) Abstract: A method and apparatus for applying medication to internal human tissue. One drug delivery member for applying medication to internal human tissue includes a medication impermeable barrier and a medication carrying matrix. The medication impermeable barrier is shaped to conform to a contour of the internal tissue. The medication carrying matrix is disposed on the barrier. The medication carrying matrix releases the medication to the human tissue upon being applied to the internal human tissue. The matrix may be adapted to adhere to the internal human tissue and/or a retainer may be used to secure the drug delivery member to the internal tissue.
